## Experience

**Front-End Developer**                                        Oct 2025 – Jan 2026
*Gaza Sky Geeks – Gaza*

- Built responsive and scalable web applications using React.js and Next.js.
- Implemented component-based architectures and reusable UI patterns.
- Applied advanced React concepts including hooks, state management, and performance optimization.
- Developed SEO-friendly pages using Next.js features such as SSR and routing.
- Styled applications using Tailwind CSS, HTML5, and CSS3 with a mobile-first approach.
- Delivered clean, consistent UI designs with utility-first styling and optimized layouts.
- Worked on real-world projects following best practices and collaborative workflows.

**Full-Stack Developer**                                        Nov 2024 – Feb 2025
*Asal Technology Company – Ramallah*

- Built dynamic web applications using React, Node.js, Firebase, HTML, CSS, and JavaScript with a focus on performance and SEO.
- Developed scalable backend systems and RESTful APIs with Node.js.
- Implemented Firebase services for real-time data synchronization and authentication.
- Delivered responsive and interactive UIs using React.
- Collaborated under Agile workflows to meet business requirements.
- Optimized databases using MySQL and Firestore for security and performance.

**Full-Stack Developer**
*New Solutions Co – Gaza*                                        Mar 2022 – Mar 2023

- Developed and maintained scalable applications with Laravel, React, Node.js, and Firebase.
- Built RESTful APIs and implemented real-time features using Firebase Realtime Database and Firestore.
- Integrated Firebase Authentication across multiple applications.
- Utilized Firebase Cloud Functions for serverless backend operations.
- Delivered tailored e-commerce solutions with secure payment gateways and third-party integrations.

**Laravel Developer**
*Oracle Media – Gaza*                                        Feb 2021 – Feb 2022

- Developed advanced backend systems with Laravel integrating frontend and Firebase services.
- Designed optimized SQL schemas and queries for high-performance MySQL applications.
- Created RESTful APIs supporting mobile and web applications with real-time updates via Firebase.
- Implemented JWT authentication and RBAC, along with Firebase Authentication.
- Managed deployments using Docker, AWS, and Heroku.
- Improved database performance through indexing, query optimization, and structural improvements.

**Front-End Developer**
*Developer Plus – Gaza*                                        Apr 2020 – Jan 2021

- Built responsive UI components using React, HTML, JavaScript, and CSS with Firebase integration.
- Collaborated with designers to deliver intuitive and interactive user experiences.

- Implemented secure login using Firebase Authentication.
- Optimized frontend performance (code splitting, lazy loading, asset optimization).
- Integrated third-party APIs and Firebase services for real-time functionality.

## Projects

**Portfolio & Professional Projects** | [My Protofile](#)

- Developed multiple projects using Laravel, React, Next.js, Node.js, and Firebase.
- Focused on building scalable applications, secure APIs, real-time systems, and responsive UIs.

## Technical Skills

**Programming Languages:** PHP, JavaScript, TypeScript, HTML, CSS, Java, C#, SQL, Python
**Frameworks & Libraries:** Laravel, Livewire, Bootstrap, React, Node.js, Spring Boot
**Databases:** MySQL, Firestore, Firebase Realtime DB
**Tools & Others:** Git, Docker, Oracle Cloud Infrastructure, RESTful APIs, Responsive UI/UX, Agile Workflow

## Education

**Bachelor's Degree in Computer Engineering**
*The Islamic University of Gaza*                                      Sep 2019 – Feb 2025
Website: https://www.iugaza.edu.ps/

**Tawjihi (General Secondary Certificate)**
*Salah Khalaf School*                                                Aug 2018 – Jul 2019

## Extracurricular Activities & Certificates

**Asal Technology Company**                                          Nov 2024 – Feb 2025
React & Node.js Training Program (React.js, Node.js API Development) | [Certificate Link](#)

**Gaza Sky Geeks**                                                   Oct 2025 – Jan 2026
Advanced React Pro Training (React.js, Next.js) | [Certificate Link](#)
